Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to the amendment filed on 3/28/05.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 9-10** are rejected under 35 U.S.C. 102(e) as being anticipated by Malmgren et al. (US 6,807,154) (hereafter Malmgren).

Regarding claim 9, Malmgren discloses the claimed subject matter "A modem, comprising a physical layer hardware unit adapted to receive user data over a first communications channel and control codes over a second communications channel, the physical layer hardware unit being further adapted to transmit an upstream data signal over the first communications channel based on transmission assignments defined by the control codes" in that communication between base station and mobile terminals includes communication of "channel codes" (i.e.; capacity) in an ACH (Announcement & Assignment Channel) and data on channels other than ACH. Further, the physical layer also is adapted to transmit uplink data signal over channels within the assigned capacity (col. 4, lines 9-47). Further, "decoding the control channel" should be inherent from the receiving end point of view in order to acquire the intended signal.

Regarding claim 10, Malmgren further discloses the claimed subject matter "wherein the control codes include at least one of a power level assignment, a frequency assignment, and a time slot assignment" in col. 4, lines 35-38.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. **Claim 19** is rejected under 35 U.S.C. 103(a) as being unpatentable over Malmgren.

Regarding claim 19, the claimed subject matter "wherein the physical layer hardware unit is further adapted to decrypt the control codes" would have been realized by one skilled in the art when encryption is utilized in the transmitted signal.

Allowable Subject Matter

6. **Claims 1-8, 15-18, 20** are allowed.

7. **Claims 11-14** objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2634

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
